Profile

Results-driven QA Engineer with 12+ years of experience ensuring top-tier product quality across diverse web, mobile, and AI projects. Proven expertise in test automation, strategic planning, and process optimization. Adept at leading QA teams, collaborating with stakeholders, and driving continuous improvement. Seeking a challenging QA role where I can leverage my technical skills and management experience to deliver exceptional software solutions.

Technical Skills

Manual Testing	● ● ● ● ●	Jira	● ● ● ● ○
Java/JS/Swift/Python	● ● ● ○ ○	Git	● ● ● ○ ○
Performance Testing	● ● ● ○ ○	Team Managing	● ● ● ● ○
Automation Testing	● ● ● ● ○	AI Testing	● ● ● ● ○
Product Management	● ● ● ○ ○	Planning, Documentation	● ● ● ● ○
API/Integration Testing	● ● ● ● ○	Agile	● ● ● ● ○
Cloud/Docker/Kubernetes	● ● ○ ○ ○	CI/CD	● ● ● ○ ○

Technical Toolkits & Languages

Manual Testing and Bug Reporting: Excel, Jira, Postman

Automated Testing: Java, JavaScript | Appium, Protractor, Karate, Detox, Postman, Selenium, Cypress, Playwright, WebdriverIO | JUnit, Jasmine, Jest, Maven

Performance Testing: JMeter, BlazeMeter and
Gatling

Development Language: Python, R, JavaScript

CI/CD/Container: Jenkins, Docker, Kubernetes

Project Management: Agile and waterfall | Jira, Trello, Assana

Work Experiences

Accenture	Tokyo, Japan
Quality Assurance Engineer	April 2025 - September 2025
● Worked on demo project for Agentic Automation ● Executed test cases, investigated failed test cases and corrected the code ● Written test cases for different products ● Coordinated and managed the team members	
Allegis Group Japan	Tokyo, Japan
Quality Assurance Engineer in Apple Inc.	October 2023- March 2024
● Ensured Siri's functionality through rigorous daily testing during development.	

- Developed and implemented automated test scripts for various Siri modules, enhancing test coverage and efficiency.
- Conducted comprehensive testing, including retests, regression tests, smoke tests, and sanity checks, to identify and report defects.

Rakuten Group, Inc.

Tokyo, Japan

Software Engineer In Test
2023

May 2022-March

- Ensured product quality and drove test process improvements as a QA Engineer.
- Collaborated with QA team members to implement necessary enhancements and share knowledge.
- Curated test plans, introduced new testing methodologies, and optimized the testing process, resulting in the successful on-time delivery of a complex live project.
- Implemented API test automation using Postman and Karate.
- Conducted tech talks and shared insights on various technology topics.
- Optimized server setup through efficient performance testing using Gatling.
- Developed and maintained a CI/CD pipeline with Jenkins to ensure site stability.

Project POC :

- Led the planning and execution of functional testing for the project.
- Established the automation framework for API testing and developed automated testcases.

UPAY Fintech

Dhaka, Bangladesh

QA Manager

November 2021 - May 2022

Worked as QA Manager where my role was to lead the QA team of 7 for testing activities, process improvement and collaborate with stakeholders.

- Handled frequent delivery of fintech product release and released around 30 products with 95% success.
- Had improved the test process to improve efficiency and quality.
- Used tracking tools like Jira to visibility of quality metrics like bug ratio with release.
- Empowered the QA team members and collaborated regularly with stockholders.

Infolytx Inc.

Dhaka, Bangladesh

Sr. Software Engineer In Test

June 2016 - October 2021

In a startup environment starting from Test engineer later as a Sr. Test engineer coordinated and led the team for Quality assurance activities, also worked as a product/project manager for 2 projects.

Project Snow(web/mobile) :

Quality Assurance:

- Spearheaded quality assurance efforts for a 3-member team, encompassing test planning, strategy development, requirement analysis, resource allocation, and upholding rigorous process and quality standards.
- Designed, executed, and meticulously documented test cases, ensuring comprehensive test coverage.
- Leveraged Jira for efficient bug tracking, reporting, and in-depth quality analysis.
- Pioneered the implementation of root cause analysis, resulting in a significant

reduction in recurring defects and enhanced overall product quality.

- Developed and executed automated test cases for mobile and web applications, achieving an impressive 90% test coverage using Appium, Detox, Protractor, and Postman.
- Collaborated closely with DevOps to establish robust CI/CD pipelines, enabling continuous automated verification and bolstering product stability.
- Conducted performance testing using Blazemeter and JMeter, actively collaborating with developers to identify and address performance bottlenecks, leading to measurable improvements.
- Performed security testing for APIs and applications using OWASP ZAP, proactively identifying and resolving critical vulnerabilities prior to release.

Project/Product Management:

- Led Agile project initiation, estimation, and requirement analysis phases, ensuring clear project scope and objectives.
- Translated stakeholder requirements into actionable user stories in Jira, fostering effective communication and collaboration.
- Facilitated Scrum ceremonies (sprint planning, daily stand-ups, retrospectives) to drive team productivity and continuous improvement.

Project FitEverywhere :

- As the sole QA resource on this healthcare-based hybrid mobile application, I designed a meticulous test plan, executed comprehensive manual tests, and developed automated test cases using Appium, achieving an impressive 90% test coverage.
- I successfully integrated the automated test suite into the CI/CD pipeline, ensuring continuous validation of the application's stability and overall quality with each code change.

Project SILK ROUTE :

- In this AI based application, performed on a 2 member QA team ,collaboratively done test plan, design and requirement analysis.
- Developed automation regression test with cypress with 80% coverage , performance test conducted by JMeter and basic security test executed.

Project N2C2 :

- Rigorously verified the NLP system developed for a 3-month global competition hosted by Harvard University (National NLP Clinical Challenges), contributing to the project's selection for showcase at Harvard.
- Contributed to the project's success by performing data analysis and cohort extraction, showcasing proficiency in utilizing data to derive meaningful insights.

Project Tada :

- Tested the API of an NLP-based system designed for CSV file column data extraction and identification. Developed and implemented integration automation tests using Postman and RestAssured.
-

Walton Group

QA Lead

Dhaka, Bangladesh

September 2015 - June 2016

In this company, where mobile phone manufactured and new OS in mobile devices verified before market release, managed as a QA Lead of 10 members where my role was to process improvement, automation scenario development and resource allocation.

- Had introduced automation strategy by Appium and 50% of repetitive task was automated.
- Developed Strategy for field testing for network test.
- Communicated with stockholder and always released the product with the deadline

Samsung R & D Institute, Bangladesh

Sr. Software Engineer

Dhaka, Bangladesh

December 2012 - August 2015

In Samsung, joined as software engineer and promoted to Sr. Software Engineer where I had coordinated a team of 15 members for testing a part of Tizen OS, Mobile device verification, Tizen SDK, developed application in new OS Tizen.

- Handled test requests from Samsung Headquarter and led the team for one of the new multi device OS named Tizen.
- Done Retest, Regression test, Smoke test and Exploratory test, release test, memory leak test and posted bugs in Jira.
- Created documentation for sharing knowledge and Conducted Training for members.
- Generated more than 10 business ideas.
- Developed mobile application with Tizen OS.

Education**Masters in applied Statistic and Data Science**

Jahangirnagar University (2020 - 2022)

Research Project: Data science/AI project for Analysis of MFS data to find importance of services.

B.Sc. In Computer Science

Khulna University (2008-2012)

Research Project: An AI project based on bioinformatics on protein fold recognition

Training

The Daily Prothom Alo, Bangladesh

3 Months internship on Prothom Alo Online

Robi Axiata Limited, Bangladesh

One-month internship at the SOC (Mobile network) Department.

Certification/Courses

1. [COURSERA] Programming Fundamentals by Duke University (2018)
2. Java Programming by Test Automation University (2019)
3. [COURSERA] HTML, CSS and JavaScript by The Hong Kong University of Science and Technology (2016)
4. Selenium WebDriver with Java by Test Automation University (2019)
5. [COURSERA] Software Security by Coursera (2020)
6. [COURSERA] Google Project Management: Professional Certificate (2024)
7. [COURSERA] Introduction to Generative AI Learning Path Specialization (2024)
8. [COURSERA] Version control with git by (2020)
9. Jest JavaScript testing framework by Test Automation University (2020)
10. Introduction to Cypress by Test Automation University (2021)

11. Web Element Locator Strategies by Test Automation University (2020)
12. Playwright with JavaScript by Test Automation University (2021)
13. API testing foundations by LinkedIn Learning (2018)
14. [LinkedIn Learning] JMeter : Performance and load testing (2019)
15. [COURSERA] Managing an Agile Team by University of Virginia (2016)
16. [COURSERA] Agile with Atlassian Jira (2020)
17. [COURSERA] Machine Learning by Stanford (2023)
18. [COURSERA] Introduction to bash shell scripting (2020)
19. [COURSERA] Practical Introduction to command line (2020)
20. [COURSERA] Introduction to Docker (2023)
21. [COURSERA] Introduction to Kubernetes (2023)

Activities and Achievement

- Prize for “Samsung Web App Testing Challenge-2013”
- Top bug founder among 300 QA engineers in Samsung in Year 2013
- Intermediate Level Programmer at Samsung Research and Development Institute
